BID SPECIFICATIONS – WAGNER ROAD #160

BID DUE DATE:

Bids must be received by the Road & Bridge Office no later than 3:00 PM on Wednesday September 26, 2012. Any bids received after that time will not be opened or considered.

SCOPE OF WORK:

Crook County is planning to improve the southern six (6) miles of Wagner Road – County Road #160 and is soliciting contractors to haul gravel and water to the site and provide dust control along the route of the project. The project is expected to begin in early October and be completed by early November (approximately October 1 – November 10).

The project involves hauling and placing approximately 18,000 tons of County-supplied J Base material from Quality Aggregates McInerney Pit south of Sundance on State Hwy. 585. The project also requires provision of a water truck to adequately wet the road to aid in compaction and along the project route to eliminate fugitive dust on the roads for the duration of the project. It is the responsibility of the bidder to determine route and mileages. The project will begin in the North and progress to the South.

Dust control on County Roads is of utmost importance to the County for not just the project area, but any County Road(s) used as a travel route to and from the project (except Clark Road #247 which has been mag chloride treated). Therefore, the contractor shall prioritize water application to the roadway starting ¼ mile of each side of any residence along the haul route on the County Roads. Secondary dust control shall be to keep the dust at a minimum on the entire Wagner Road. Dust control shall be proactive and occur daily with the water truck in advance of project-related haul trucks throughout the duration of the project, to any part of the project area and any County Roads used for hauling to and from the project site as directed by Crook County Road & Bridge.

PAYMENT TERMS

- ✓ The successful bidder will be paid for the actual tonnage hauled above or below the 18,000 tons as computed using scale tickets.

BIDDERS/CONTRACTORS RESPONSIBILITIES

- ✓ Work only during daylight hours Monday Through Friday with no loads arriving to project any later than 5:00 PM.
- ✓ Work under the supervision/coordination of the County Road and Bridge Project Foreman.
- ✓ Travel 5 mph under all posted speed limits on County roads.
- ✓ Provide the Project Foreman with all the load tickets at the end of each day.
- ✓ Haul and apply water to the road(s) as requested by Road & Bridge Project Foreman.
- ✓ Provide dust control on any County Road used for travel to and from the project location upon request of the Road & Bridge Office.

Equipment specifications/requirements

- ❖ Minimum of five (5) to maximum of eight (8) tractors with single or double belly dump trailers capable of legally hauling a minimum of 23 tons by WYDOT standards.
- ❖ Water truck must be sized and equipped to provide adequate water for the amount of trucks involved in the project, and may require more than one truck.

CROOK COUNTY RESPONSIBILITIES

- ✓ Provide and maintain all necessary road work and traffic control signage.
- ✓ Provide water source along Wagner Road #160.
- ✓ Provide equipment and personnel to spread the gravel and keep the road in travelable condition.
- ✓ Provide approximately 18,000 tons of J Base material.
